

# DOKMEE<sup>®</sup> *Capture*

---

HIGH VOLUME IMAGE AND DATA CAPTURE

# Operating System Compatibility

Supports Windows

Does not support Mac

No web browser interface

Compatible with Microsoft Windows

*(Vista and higher)*

Windows Vista™

 Windows® 7

 Windows® 8

 Windows 10

# Centralized Data & Image Storage

---

## MICROSOFT SQL BACKEND DATABASE

- Can connect to an existing **Microsoft SQL Express** or **Microsoft SQL Standard** Server.

## CENTRAL PATH STORAGE IN WINDOWS FILE SYSTEM

Working batches and images are stored in a centrally located local or shared network **Windows File System** folder.

# The Dokmee Capture Workflow

---

Steps can be modified and reordered.

# Scan & Import

---

- Scan from most **TWAIN** and **ISIS** driver scanners.
- Integration with scan time image enhancement software that attach to scanner TWAIN and ISIS drivers.
- Automatic blank page removal at scan time.
- Hot folder monitoring for MFP and Network scanners using Active Import.
- Automatic document separation using: **Patch Code**, **Barcode**, **Text OCR**, **Specific # of Pages**

# Ensure Quality, Accuracy, and Speed

---

- Post scanning image enhancement options such as **deskew**, **despeckle**, **crop**, **hole punch removal**.
- Post scanning blank page removal module.
- Recycle bin to recover accidental deleted pages.
- Editing tools and practical time saving shortcut options such as hot keys that are intuitive to use make the scanning and quality control process faster and more accurate than ever.

# Automated Data Capture

---

Dokmee Capture provides the tools for efficient and accurate automated data extraction.

**OCR**

Typed Text  
Recognition

**MICR**

Banking Font
