MaxMan

print management simplified

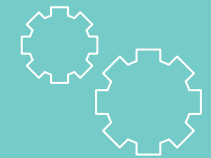

Control your print environment

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

MaxMan, our locally developed software program, is designed to give you control over your printing environment. Deployed centrally on your print server or locally onto each desktop, MaxMan is guaranteed to save you money on your printing and paper costs.

MaxMan has been developed to:

- allow print homing
- facilitate an accurate cost recovery
- monitor printing with user authentication
- provide real-time custom reporting
- increase document security
- minimize print and paper wastage
- manage internal cost allocation
- provide detailed management reports

CUSTOM SOLUTIONS

A key factor which truly sets us apart from our competitors is our ability to customize our software for each client's individual needs. So whether your system is simple or complex MaxMan can be set up to meet your exact requirements

flexible solutions for your business needs

WHO IS THIS DESIGNED FOR?

- CONSULTING FIRMS
- ATTORNEYS
- EDUCATION INSTITUTES
- CORPORATE BUSINESSES
- FRANCHISORS
- MINING CONSORTIUMS
- BANKING INSTITUTES
- ANY OTHER COMPANY

COST RECOVERY

MaxMan assists law/consulting firms of any size to turn their clients' printing expenses into revenue for the firm. Cost recovery enables correct chargeback through detailed and accurate billing to each and every client.

This facility is also used by schools, banking etc

- Customized pop-ups allow correct client allocation
- Billing is easily imported into most accounting packages
- Maximize cost recovery with minimal effort
- Considerable return on investment

RULES BASED PRINTING

By creating printing rules the MaxMan software encourages optimum print utilization through your system. Various rules can be applied to users or user groups to ensure that printing/copying isn't abused.

- Control colour vs. b/w printing permissions
- Send bulk jobs to high-spec printers
- Reduce overall printing costs
- Prolong the lifespan of your devices

MOBILE PRINT (email to print)

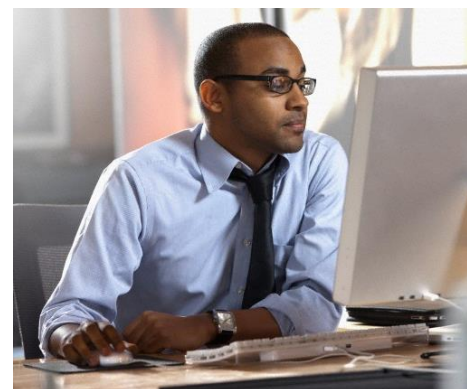

This functionality taps into the universal email capability on all mobile devices. All users registered on the system with an email address in their credentials will be able to print. The user simply sends an email with the print documents as .pdf attachments to a designated email address. The MaxMan system identifies the user and processes the attachments for printing and retrieval as any standard print job.

- Universal
- Simple
- Flexible

PRINT MANAGEMENT CONSULTING PROVIDES A TOTAL END TO END SOLUTION

PRINT HOMING

Whether is it password, key or card based, the Print Homing facility enables secure print release for sensitive print jobs to any device on the print network while also helping to reduce paper wastage.

Staff productivity and better device management is also improved as printing is not limited to one device or restricted to desktop devices for secure printing. Users can now safely print anywhere in the organization with confidence.

- Documents are released with passwords, keys or cards
- Increased convenience as documents can be released from any printer on the network
- Reduces paper wastage
- Improves document security
- Increased employee efficiency

SERVICE AND SUPPORT

Our team of qualified engineers, developers and support staff are equipped to provide various means of training and support. Our careful attention to the needs of our clients ensure that we provide the fastest and most thorough assistance possible

TRUSTED PARTNER

Established in 1986 Effective Control Systems has been in the print and copy management environment longer than anyone else in South Africa. Trust us to partner with you in finding a solution which works for you.
